

Muhammad Suleman

Full Stack Engineer | Fintech Engineer | Built PakPay (Fintech SaaS)

suleman.devx@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

Full Stack Engineer with 2+ years building production-grade, enterprise-level applications. Proficient in JavaScript, TypeScript, React, Node.js, and SQL/NoSQL databases with strong OOP, REST API, and software design fundamentals. Founder of PakPay (fintech), builder of multi-campus SaaS and conversational analytics platforms. Experienced in international client management, deadline ownership, and mentoring developers.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS

Backend: Node.js, Nest.js, Flask, REST APIs, GraphQL, WebSockets, Event-Driven Architecture

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM — schema design, migrations, SQL queries

OOP & Design: Object-Oriented Programming, SOLID, MVC, Microservices, Data Structures & Algorithms

DevOps & Tools: Git, GitHub, Docker, AWS (EC2, Lambda, ECS, S3), CI/CD, Nginx, Kubernetes

EXPERIENCE

Forward Program Member — McKinsey & Company (McKinsey Academy)

Apr 2026 – Present

- Competitively selected into the 10-week McKinsey Forward Program — focused on financial modeling, structured problem-solving, consulting communication, and pre-internship preparation.

Founder & Software Engineer — PakPay – Fintech Platform

2025 – Present

- Created and deployed a full-stack fintech MVP (web and mobile) within 6 months with Next.js, Node.js, and PostgreSQL; attracted over 1,000 users upon launch through Google Analytics validation.
- Designed scalable and high-performing systems comprising real-time WebSocket pipeline integration, secure wallet infrastructure, and banking webhook connectivity, handling 1,000+ concurrent users and ensuring efficient transactional execution.
- Enhanced system efficiency and scalability by utilizing vertical scaling techniques and employing Prisma Accelerate technology, resulting in API latency reduction (~30-40%) and faster page loading speed.

Digital Skills Trainer & Client Liaison — Jugnuu

2025 – Present

- Train developers and teachers in JavaScript, React, and full-stack development; deliver structured programming lectures aligned with industry practices.
- Primary point of contact for US/Canada clients — gather requirements, manage tasks, and ensure on-time delivery across multiple concurrent projects.
- Mentor students in building scalable apps and debugging production issues, reinforcing professional software engineering best practices.

Teaching Assistant — Aptech Pakistan

Mar 2024 – Apr 2025

- Assisted in teaching front-end development courses covering HTML, CSS, JavaScript, React, Angular, and Vue.js to large student cohorts.
- Organized and led workshops and coding events to promote practical learning and teamwork; supported students through tutoring, hands-on labs, and project feedback.

PROJECTS

School Management SaaS | *Next.js, Node.js, PostgreSQL, REST APIs, Docker*

- Odoo-inspired multi-campus system deployed across 5+ campuses, role-based access, centralized data management, and real-time cross-campus sync.

PakPay – Digital Wallet | *Node.js, PostgreSQL, MySQL, React, LLM APIs*

- Full-stack fintech platform: secure transactions, wallet system, real-time payment processing, and user authentication evolved from a prototype into a scalable, production-ready solution.

LLM Architecture Deconstruction Study | *Next.js, Node.js, REST APIs, LLM APIs*

- Conducted a reverse-engineering case study using Claude to analyze problem-solving platforms and AI chat systems deconstructed code execution flows, streaming responses, and LLM integration patterns to understand production-grade architectures.

EDUCATION

BS Software Engineering — University of Karachi (UBIT) 2023 – 2026

Coursework: Data Structures & Algorithms, OOP, Database Systems, Software Design, Computer Networks.

Full Stack Web Dev Certification — 100xDevs 2025

Intensive program: JavaScript, React, Node.js, and full-stack project delivery.
